actionable strategies for businesses to achieve climate neutrality climate change is not just an environmental issue it is a fundamental business risk that demands urgent action from companies of all sizes and industries while reducing greenhouse gas emissions is essential reaching full co2 neutrality remains a significant challenge traditional carbon offsetting alone will not be enough to drive meaningful impact to stay ahead business leaders must go beyond mitigation and actively contribute to removing carbon from the atmosphere marian krüger and benedict probst highlight the most effective carbon removal strategies and share practical insights on how companies can integrate these solutions today regardless of where they stand in their sustainability journey

this dissertation examines the law and economics of generic drug entry and the problems that arise from specific u s regulatory arrangements that govern innovation and competition in the market for patented pharmaceuticals as chapter 1 explains competitive entry by generic drug makers is limited by both patents and industry specific regulation which together provide the means for brand name drug makers to avoid competition and thereby recoup large investments in research development and testing at the same time the complex rules of the hatch waxman act furnish a pathway by which generic drug makers may challenge the validity or scope of brand name patents with a view to entering the market with a competing product prior to patent expiration the subsequent chapters examine several aspects of the competitive interaction between brand name and generic drug makers chapter 2 analyzes settlements of patent litigation between brand name and generic drug makers in which the brand name firm pays the generic firm in exchange for delayed market entry such pay for delay settlements are an important unresolved question in u s antitrust policy the analysis reveals that the pay for delay settlement problem is more severe than has been commonly understood several specific features of the act in particular a 180 day bounty granted to certain generic drug makers as an incentive to pursue pre expiration entry widen the potential for anticompetitive harm from pay for delay settlements compared to the usual understanding in addition i show that settlements are innovation inefficient as a means of providing profits and hence ex ante innovation incentives to brand name drug makers to the extent that congress established a preferred tradeoff between innovation and competition when it passed the act settlements that implement a different less competition protective tradeoff are particularly problematic from an antitrust standpoint chapter 3 synthesizes available public information about pay for delay settlements in order to offer a new account of the extent and evolution of settlement practice the analysis draws upon a novel dataset of 143 such settlements the analysis uncovers an evolution in the means by which a brand name firm can pay a generic firm to delay entry including a variety of complex side deals by which a brand name firm can compensate a generic firm in a disguised fashion it also reveals several novel forms of regulatory avoidance the analysis in the chapter suggests that as a matter of institutional choice an expert agency is in a relatively good position to conduct the aggregate analysis needed to identify an optimal antitrust rule chapter 4 examines the co evolution of increased

brand name patenting and increased generic pre expiration challenges it draws upon a second novel dataset of drug approvals applications patents and other drug characteristics its first contribution is to chart the growth of patent portfolios and pre expiration challenges over time patenting has increased measured by the number of patents per drug and the length of the nominal patent term during the same period challenges have increased as well and drugs are challenged sooner relative to brand name approval the analysis shows that brand name sales a proxy for the profitability of the drug have a positive effect on the likelihood of generic challenge consistent with the view that patents that later prove to be valuable receive greater ex post scrutiny the likelihood of challenge also varies by patent type and timing of expiration conditional on sales and other drug characteristics drugs with weaker patents particularly those that expire later than a drug s basic compound patent face a significantly higher likelihood of challenge though the welfare implications of hatch waxman patent challenge provisions are complicated these results suggest these challenges serve a useful purpose in promoting scrutiny of low quality and late expiring patents
